

Broad River Elementary School

Work Days as Announced

The Kindergarten class plants and tends a large vegetable and flower garden. This year, drip irrigation was installed, and the class hopes to sell its produce at the local Farmers' Market. This is the fourth year for this garden; a tribute to their teacher, Debra Graf.

Master Gardeners continue to provide supervisory assistance, and hold workshops about seed starting, worm farming, etc. They have expanded the garden to have a fruit orchard; starting this year with an orange tree.

A 'Flying Critter' Garden was planted last year to attract birds, bees, butterflies and hummingbirds. It's a very popular place to watch flying wildlife.
